

## Leading Subway Franchise Invest in Plasma Guard Energy Saver to improve sustainability & reduce energy consumption

The Subway portfolio consisted of several franchises that offers both drive through, seated restaurants and retail shops. To reduce kWh consumption and improve their sustainability, our Energy Saver was installed and connected to ceiling mounted down flow 5.3kW & 6.1Kw AC units located in the food preparation and the serving and eat areas.

Two AC -01 air conditioning units are saving Subway 4124 kWh per year and over 1175kg of CO<sub>2</sub>. Plasma Guard Energy Saver is saving Subway over \$755 in electricity overspend representing an annual reduction in electricity consumption of 29%.
