TRG operate a diverse portfolio of popular brands, each with their unique and differentiated offering... all with great hospitality at their core.

To improve the sustainability of their restaurant group TRG have invested in Plasma Guard Energy Saver technology to reduce kWh consumption across their walk in refrigerators at their restaurants.

Plasma Guard Energy Saver is on average reducing kWh consumption by around 4kWh per day equating to an annual reduction in energy consumption of around 30% per annum.

One Plasma Guard Energy Saver AR - 01 refrigeration intelligent thermostat is saving TRG over 1460 kWh per annum and reducing CO2 by 730 kg. The investment in technology will payback comfortably within 2 years. As the price of electricity continues to rise investing in Plasma Guard Energy Saver makes huge financial and sustainable sense.

savings: 4.0 kWh per day.

30% Energy Savings
